Comsec Solutions & Investigations

BRAND PROTECTION - INVESTIGATIONS - LOSS PREVENTION

Comsec was initially founded as a corporate investigations company, specialising in the detection, investigation and prevention of corporate fraud and intellectual property infringement.

Through our work we have become experts in online brand protection and fraud detection through our cutting-edge investigative software, *Watchdog*.

- *Watchdog* automates the time-consuming task of monitoring internet-based data sources such as auction sites, search engines and domain names
- Comsec offers you a unique blend of traditional services and software solutions, for complete brand protection
- An efficient, cost-effective and easy to use solution that simplifies the process of protecting your brand online
- Zip/Postcode analysis capability, allowing interrogation of location data
- Protection and management of your portfolio of domain names across the internet
- Protect the exclusivity rights of your channel partners/resellers by removing grey market goods and imports
- Monitor consumer sentiment and manage your brand(s) reputation in the online environment

Online Brand Protection, Simplified.
